EDUARDO NAVÍO MAYA

SOFTWARE DEVELOPER

Software Developer with experience in designing and developing web and mobile applications focused on enhancing user experience and optimizing processes. Familiar with modern technologies and committed to implementing practical and scalable solutions. Proactive and adaptable, with the ability to work in Agile environments and effectively collaborate to achieve high-impact goals.

MOST RECENT WORK EXPERIENCE

Full Stack Developer (Needcarhelp sl)

August 2024 - Present [Barcelona, Spain]

Responsibilities

- Design and develop a user dashboard for clients, allowing them to access a personal space where they can view and manage their contracted services, enhancing the overall customer experience.
- Implement improvements and develop new functionalities in the company's offered services, focusing on increasing customer acquisition and retention through scalable and efficient solutions.
- Actively participate in the development of a mobile application to automate internal processes, optimizing time and resources within the company.
- Collaborate closely with designers and other developers in an Agile environment to meet project deadlines and objectives.

Key Achievements

- Designed and implemented a passwordless user authentication system, ensuring high security standards and significantly improving the user experience by simplifying service access.
- Integrated this system into internal applications used by employees, enabling the automation of key processes, enhancing usability, and reducing the IT department's operational load in credential management.
- Optimized internal workflows, achieving significant savings in time and resources while strengthening the overall security of the company's application ecosystem.
- Implemented automated processes that reduced workloads in internal departments, increasing operational efficiency and enabling other teams to focus on higher-value strategic tasks.
